SUMMARY

Front End Developer with 1 year of solid experience in all aspects of front-end development using TailwindCSS, HTML, Javascript and NextJS. Proven ability to take an idea from concept to completion.

PROJECTS

Best Eats Web Application

· A responsive food delivery website built to provide users with an intuitive experience for browsing, filtering, and ordering food from top-rated restaurants.
· **Features**:
 · Dynamic menu filtering by category and price to enhance user navigation.
 · Interactive components, including a featured promotions section and a visually engaging hero banner.
 · Seamless toggle functionality for delivery or pickup options.
 · Responsive design to ensure a consistent experience across devices.
· **Technologies Used**:
 · **Frontend**: React.js and Tailwind CSS for a fast, modern, and scalable interface.
 · **Deployment**: Hosted via GitHub Pages for live demonstration.

Data Finance Website

· A modern data analytics and financing website designed to showcase the benefits of data-driven decision-making for businesses. Built with React and Tailwind CSS, the website delivers a professional and visually appealing experience.
· **Features**:
· · Hero section with clear and concise call-to-action elements.
 · Data analytics dashboard preview, showcasing insights and tools for centralized management.
 · Newsletter subscription form for user engagement and updates.
 · Fully responsive design for optimal viewing on desktop and mobile devices.
· **Technologies Used**:
· · **Frontend**: React.js for component-based development and Tailwind CSS for efficient styling.
 · **Deployment**: Hosted via GitHub Pages for easy access and demonstration.

React Jobs Web Platform

· React Jobs Web Platform A specialized job board application designed to connect React developers with employers, providing a streamlined platform for job posting and job seeking in the React ecosystem.
· **Features**:
· · Dual-interface system catering to both developers and employers with role-specific functionalities
 · Comprehensive job browsing section for developers to explore React-focused opportunities
 · Employer dashboard for posting and managing job listings
 · Recent Jobs showcase section highlighting the latest opportunities
 · Clean, modern UI with intuitive navigation and responsive design
· **Technologies Used**:
· **Frontend**: React.js for component-based development and Tailwind CSS for efficient styling.
· **Deployment**: Hosted via GitHub Pages for easy access and demonstration.
·
